<p>Do you currently own a domain name you would like to use? [If Yes, and you would like to use this domain name there are two options: 1) keep the domain where it is and forward the login/password to me so I can publish your site to your hosting service (you will continue to be responsible for paying and maintaining your domain name and hosting service); 2) the preferred method is to allow me to transfer the domain name to my servers and I will take responsibility for renewing your domain name <u>at my cost</u> (please note, industry standards prevent domain name transfers to once every 60 days).]</p>	No, Yes
<p>Preferred template color of your website: (Recommendation: pleasing colors tend to be better and also tend to be more universal across monitors; with white background for content areas is easier to read)</p>

In order to build your site I need your page contents. **Please email content for each page.** Most important, your Home page should immediately state what services you offer. Remember, Internet users are like clients with ADD/ADHD – you literally have up to 8-seconds to capture their attention.

Please check the boxes below of the pages you would like on your website – *these are only recommendations, feel free to add others, and more can be added later.*
